

DR NORASHIQIN MISNI

BSc (UKM), MSc (UKM), PhD (UM)

She is a Senior Lecturer at the Unit of Parasitology, Department of Medical Microbiology and Parasitology. Her research area is mainly focused on the mosquito control and the development of insecticides product against mosquito. In this research, she is exploring the potential of microencapsulation in plant-synthesized nanoparticles as botanical insecticides. She has received research grants from Ministry of Higher Education to support her research.

She is also interested in research related to the plant sugar-feeding preferences in mosquito to develop environmentally friendly and effective mosquito control. Besides, she is a member of Malaysian Society of Parasitology and Tropical Medicine (MSPTM) and a member of International Society of Neglected Tropical Diseases (ISNTD).
