

Short biography

Associate Professor Dr. Chee Hui Yee
BSc, MMedSc, PhD

Dr. Chee primary research interest is understanding the pathogenesis of dengue virus. She also work on antiviral and molecular diagnostics of infectious diseases including dengue, leptospirosis and respiratory virus infections. She is currently working with researchers from University of Cambridge on the development of affordable, near-patient diagnostics to distinguish infectious diseases. Her outstanding performance in journal publication, has brought her the awards of Anugerah Fellowship Naib Canselor in 2018 and being nominated for the prestigious Anugerah Akademik Negara 2018.

Dr. Chee is a regular guest speaker on Mandarin TV live shows and Radio stations to share her knowledge and expertise in infectious diseases particularly on zoonotic diseases including H5N1, Rabies, Monkeypox, Leptospirosis and recently on COVID-19. She has been extensively involved in setting up molecular diagnostic lab for the detection of SARS-CoV-2 and supervising the team in Hospital Pengajar UPM.
