

MY PROFILE

Dr Rahima Dahlan @ Mohd Shafie

Dr Rahima is a child and adolescent psychiatrist. She received her medical degree (MBBS) from the International Islamic Universiti Malaysia (IIUM) and Master of Medicine (MMed) Psychiatry from the Universiti Kebangsaan Malaysia (UKM). She further subspecialized in child and adolescent psychiatry from the subspecialty training in the Ministry of Health, Malaysia and obtained Master of Science (MSc) in Child and Adolescent Mental Health from the Institute of Psychiatry, Psychology and Neuroscience (IoPPN), King's College London, United Kingdom.

Her specialty is in the evaluation and treatment of children with learning disabilities and neurodevelopmental disorders as well as adolescents and families experiencing emotional, behavioral and/or relationship difficulties.

Dr. Rahima serves as a panel referee for Pusat Genius Kurnia Malaysia, an early intervention centre for children with autism and their families. Currently, she is a member of the technical committee for research on the prevalence of autism in Malaysia.

Her clinical and research interests are mainly in learning disabilities and other neurodevelopmental disorders, child, and adolescent mental health as well as school-based mental health promotion-intervention. She has been actively involved in various programs, public forums and media appearances for awareness, promotion, and prevention of mental health and wellbeing in children, adolescent, and family.
