

Dr. Liew Chuin Hen is a lecturer, pediatrician, clinical researcher. He currently serves at the Faculty of Medicine and Health Sciences, Universiti Putra Malaysia (UPM), and Hospital Sultan Abdul Aziz Shah, UPM.

Dr. Liew obtained his Doctor of Medicine (MD) from Universiti Sains Malaysia, Master of Paediatrics (MPAEDS) from the University of Malaya, and Master of Health Informatics and Analytics (MHIA) from IMU University. This multidisciplinary training has shaped his professional identity as a pediatrician-researcher who integrates clinical pediatrics, evidence-based medicine, biostatistics, health informatics, and artificial intelligence to improve child care and advance research.

His core areas of expertise include general pediatrics and health data analytics. His research interests include pediatric infectious diseases, immunology and allergy, nutrition, probiotics, digital health, and artificial intelligence in healthcare.

In his academic role, Dr. Liew teaches clinical medicine to undergraduate and postgraduate learners. He is also actively involved in teaching biostatistics, evidence-based medicine, and research methodology to healthcare researchers and professionals. Beyond teaching, he provides clinical research consultation and data analysis support. Through his integrated roles as clinician, educator, researcher, he continues to build a career dedicated to advancing pediatric research.
